

TC3XY series access controller is KEYKING security based on years of experience in well-developed network access controller, which is responsible for radio frequency identification card, the user data is loaded, information storage, door control, access control, fire alarm interlock control linkage can be Access smoke, wet flu analog or digital, switch status signal can control lighting, CCTV, fire alarm equipment, access controller access control system is an important part.

TC3XY products support RS232, RS485, TCP/IP communication protocol, can be run independently off-line, but also through the INTERNET, LAN, VPN networking supporting joint operation, can manage up to tens of thousands of door to door.

TC388NT-B build in with Power Supply in Metal Box.

## Product Specification

Device	TC388NT-B
CPU	32-bit ARM Cortex-M3 Processor
Event Storage	15000 events
Support Card	30000 cards
Reader Input	8 Readers
Door Output	8 (NO/NC)
Auxiliary Output	0 (NO/NC)
Auxiliary Input	0 (NO/NC)
Reader Input Format	24-72 bits Wiegand Reader Format
Communication	RS232, RS485, TCP/IP
Communication Rate	9600, 4800 Kbps
Operating voltage	12 VDC
Size in Metal Case	403×384×72mm
